Engagement with policymakers

The Working Group's efforts resulted in several key findings and policy recommendations.

Included in this report you will find the:

- Current State of Childcare in Nevada
- National Childcare Research
- Best Practices in Nevada
 - Rural Nevada
 - Southern Nevada
 - Northern Nevada
- Policy Recommendations for Consideration
 - Infrastructure
 - Workforce
 - Audit

Current State of Childcare in Nevada

Supply and Demand Issues: Access and Cost

- Demand is high with over 65% of Nevada children in households where both parents work;
- Nevada is a childcare desert;
- 74% of Nevada children ages 0-5 do not have access to licensed childcare;
- Every Nevada county is a childcare desert, rural and urban;
- Nevada childcare is more expensive than college tuition;
- The younger the child, the more expensive and harder to find childcare.

- Provider operational grants – sustain & improve
- Family financial support to recover & return to work
- Workforce retention and expansion
- Business supports and automation
- Long-term sustainability of early learning programs
- Equitable access to quality providers that meet needs of all families

* Month funding authorized by Nevada Legislature not federal enactment

Current State of Childcare in Nevada

GOWINN's Childcare Survey to the Business Community

The convenience sample survey was open from December 15, 2022 through January 15, 2023. 511 businesses responded providing quantitative research to better understand the relationship between childcare and labor force.

Highlights:

- Geographic distribution of survey respondents is a relatively accurate portrayal of the population distribution within the State.
- Respondents shared how greater access to childcare could improve their business.
 - 94.5% believe access to childcare would improve their workforce retention;
 - 75.5 % believe access would provide better business stability;
 - 67.8 % believe their business would experience more productivity
- Childcare would also improve growth, profit, and workforce retention for these businesses, as indicated from these results.
- A majority are interested in providing childcare for their employees, and there is interest in exploring the options with 45F.
 - 88.9 % are not familiar with the Employer-Provided Child Tax Credit, 45F;
 - Only 1.8 percent of respondents use 45F.

National Childcare Research

The U.S. Chamber of Commerce recognizes the role that business has to play in childcare reform and offers four solutions that employers can offer in the short term to alleviate childcare concerns for their employees:

- Research existing childcare options in the community and provide a childcare directory for employees.
- Contract with a third party company to assist employees in connecting with childcare providers.
- Offer a Dependent Care Flexible Spending Account (DCFSA).
- Educate employees about their tax options.

12 million children under the age of 5 need access to childcare everyday

U.S. Department of the Treasury coins structural issues to the childcare industry as market failures. Examples of market failures include:

- 1) low wages to childcare workers despite the labor-intensive job requirements of caring for small children;
- 2) for-profit childcare facilities operate on razor-thin profit margins, usually less than 1%
- 3) inequities in childcare supply for low-income or nonwhite children lead to poor families being underserved
