

Policy Summary

SCP 5.8

Governor's Reserve Funding Set Aside for Pilot Projects

As part of its' responsibility to provide guidance and direction to the Local Workforce Development Boards (LWDBs), the Department of Employment, Training and Rehabilitation (DETR) follows federal guidance in creating policy to implement the Workforce Innovation and Opportunity Act (WIOA). These policies are necessary for efficient and stable operations of the workforce system in the State of Nevada. As such, DETR has provided SCP 5.8 to the Governor's Executive Committee for review and approval.

This policy provides the requirements for the use of Governor's Reserve funds in special projects and the monitoring of funds. The purpose of this revision is to update the formatting, federal regulations, and references throughout the policy, in addition, hyperlinks have been added for easier accessibility to reference documentation. This policy is being revised for compliance and to provide clear and concise guidance to the LWDBs for local area policy development. Revisions now satisfy an audit finding by the Department of Labor (DOL), which found Nevada had insufficient subrecipient monitoring and oversight procedures within the policy. Guidance within Nevada's Technical Assistance Guide (TAG) 25-02 has been added to clarify the selection process as well as monitoring process of these funds.
